

Practice 1: Read and write numbers

Name: _____ Date: _____

Write each number in standard form.

1. Six million, forty-two thousand, nineteen

Work space

2. Eight hundred five million, seven thousand, three hundred

Work space

Practice 2: Expanded form

Write each number in expanded form. ::: {.problem #p02-01}

1. 4,305,070

Work space

2. 90,008,604

Work space

....

Practice 3: Digit values

Give the value of the bold digit. ::: {.problem #p03-01}

1. 63,**8**14,205

Work space

2. 7,041,900,**0**02

Work space

....

Practice 4: Place names

Name the place of the underlined digit.

1. 5,264,901

Work space

2. 81,035,700

Work space

Practice 5: Build a number

Use the clues to write one number.

1. 6 in the millions, 3 in the ten-thousands, 8 in the hundreds, 2 in the ones; all other digits are 0.

Work space

2. 9 in the hundred-millions, 4 in the thousands, 7 in the tens, 5 in the tenths place is not allowed: write a whole number using the first three clues.

Work space

Practice 6: Zeros as placeholders

Explain what each zero does, then read the number.

1. 4,006,030

Work space

2. 70,000,508

Work space

Practice 7: Compare numbers

Write $<$, $>$, or $=$.

1. 7,405,018 ____ 7,450,018

Work space

2. 83,000,900 ____ 83,000,090

Work space

Practice 8: Order least to greatest

1. Order: 304,500; 340,050; 304,050; 304,005.

Work space

2. Order: 8,010,000; 8,001,000; 8,100,000; 8,000,100.

Work space

Practice 9: Order greatest to least

1. Order: 5,678,901; 5,687,901; 5,678,091; 5,608,971.

Work space

2. Order: 92,001,400; 91,999,999; 92,010,040; 92,000,140.

Work space

Practice 10: Compare using place value

Circle the greater number and name the first place where they differ.

1. 41,209,876 or 41,290,876

Work space

2. 600,070,004 or 600,007,040

Work space

Practice 11: Rounding to a place

Round as directed.

1. 4,638,291 to the nearest thousand

Work space

2. 72,450,600 to the nearest hundred-thousand

Work space

Practice 12: Rounding large numbers

1. 899,501,200 to the nearest million

Work space

2. 35,049,999 to the nearest ten-thousand

Work space

Practice 13: Rounding decisions

Show the neighboring place value that controls your answer.

1. Round 6,274,350 to the nearest ten-thousand.

Work space

2. Round 98,765,432 to the nearest hundred-million.

Work space

Practice 14: Estimate by rounding

Estimate each sum by rounding both addends to the nearest thousand.

1. $248,617 + 391,482$

Work space

2. $704,299 + 165,801$

Work space

Practice 15: Number lines and intervals

Use the clues to identify the number.

1. What number is halfway between 20,000 and 30,000?

Work space

2. Name the midpoint between 4,600,000 and 4,800,000.

Work space

Practice 16: Powers of ten

Multiply or divide by the power of ten.

1. $53,204 \times 1,000$

Work space

2. $8,700,000 \div 100$

Work space

Practice 17: Regrouping digits

Move the indicated digit and write the new number.

1. In 24,681,903, replace the 6 with 9. What is the new number?

Work space

2. In 507,230,016, replace the digit in the thousands place with 8.

Work space

Practice 18: Real-world place value

Show your comparison or rounding.

1. A stadium had 68,405,120 online views and another had 68,450,012. Which had more?

Work space

2. A city budget is \$245,678,900. Round it to the nearest million.

Work space

Practice 19: Mixed review

1. Write 305,040,007 in words and expanded form.

Work space

2. Order least to greatest: 9,090,009; 9,009,090; 9,900,009; 9,009,009.

Work space

Practice 20: Challenge review

Explain your reasoning clearly.

1. Find the greatest 8-digit whole number that rounds to 43,000,000 to the nearest million.

Work space

2. A number has 7 in the ten-millions, 2 in the hundred-thousands, and 9 in the tens place. Its other digits are zero. Write it, then round it to the nearest million.

Work space
