
Decimal Place Value and Operations — Grade 5 Answer Key

Page 1

1. Four and three hundred eight thousandths; $4 + 0.3 + 0.008$. 2. 7.045; $7 + 0.04 + 0.005$. 3. 0.06, six hundredths.

Page 2

1. The 4 moves from tenths to ones: 0.4 to 4. 2. 62.5, 625, 6,250. 3. 8.24; digits shift one place right in value.

Page 3

1. $=$. 2. $<$ ($5.206 < 5.260$). 3. 2.005, 2.05, 2.15, 2.5.

Page 4

1. 8.7. 2. 19.50. 3. Nearest whole: 7 miles; nearest tenth: 7.0 miles.

Page 5

1. 17.287. 2. 20.552. 3. 4.375 miles.

Page 6

1. 12.154. 2. 5.525. 3. 11.775 liters.

Page 7

1. Estimate 54; exact 54.575. 2. Estimate 15; exact 15.414. 3. 3.625.

Page 8

1. 13.04. 2. 74.430. 3. \$22.00.

Page 9

1. 48.2. 2. 7,090. 3. 100.

Page 10

1. 2.1. 2. 7.35. 3. 2.4 pounds per bag.

Page 11

1. 6.35. 2. 0.0408. 3. 0.725.

Page 12

1. 12. 2. 0.252. 3. 4.2 square feet.

Page 13

1. 8. 2. 20.8. 3. 15 pieces.

Page 14

1. \$24.84. 2. \$6.32. 3. \$6.90.

Page 15

1. 15.15 feet. 2. 1.625 liters. 3. 25.5 miles.

Page 16

1. 5.325. 2. 5.335. 3. 1.8.

Page 17

1. $3(4.25) + 2.50 = 15.25$, so \$15.25. 2. $12.5 - 7.85 = 4.65$ miles. 3. $9.6 \div 6 = 1.6$ liters.

Page 18

1. False: $0.45 < 0.5$ because $0.45 < 0.50$. 2. False: $2.4(0.2) = 0.48$, smaller. 3. 9.74 is reasonable; $48.7 \div 5 = 9.74$.

Page 19

1. $6.249 \rightarrow 6.25$; $6.25 + 3.75 = 10$. 2. 26.4. 3. 3.1 meters.

Page 20

1. $6.25 \times 3.2 = 20$ square meters. 2. $50 - [3(4.85) + 2.75] = 32.70$, so \$32.70. 3. Example: 4.065; it is greater than 4.060 and less than 4.070; four and sixty-five thousandths.
