

Practice 1: Read and write decimals

Name: _____ Date: _____

Write each decimal in words and expanded form.

1. Write 4.308 in words and expanded form.

Work space

2. Write “seven and forty-five thousandths” as a decimal and expanded form.

Work space

3. What is the value of the digit 6 in 12.064?

Work space

Practice 2: Place-value patterns

Name: _____ Date: _____

Use place value to explain each change.

1. In 3.47, what happens when the 4 is moved one place to the left? What is its new value?

Work space

2. Multiply 6.25 by 10, 100, and 1,000.

Work space

3. Divide 82.4 by 10 and explain the digit movement.

Work space

Practice 3: Compare decimals

Name: _____ Date: _____

Use $>$, $<$, or $=$. Add zeros when they help.

1. 0.7 ____ 0.70

Work space

2. 5.206 ____ 5.26

Work space

3. Order from least to greatest: 2.05, 2.5, 2.005, 2.15.

Work space

Practice 4: Round decimals

Name: _____ Date: _____

Circle the place you are rounding to, then solve.

1. Round 8.746 to the nearest tenth.

Work space

2. Round 19.503 to the nearest hundredth.

Work space

3. A trail is 6.958 miles long. Round its length to the nearest whole mile and nearest tenth.

Work space

Practice 5: Add decimals

Name: _____ Date: _____

Line up the decimal points.

1. $14.38 + 2.907$

Work space

2. $0.605 + 7.9 + 12.047$

Work space

3. Maya walked 2.75 miles in the morning and 1.625 miles later. How far did she walk?

Work space

Practice 6: Subtract decimals

Name: _____ Date: _____

Add zeros if needed before subtracting.

1. $20.000 - 7.846$

Work space

2. $9.4 - 3.875$

Work space

3. A tank holds 18.5 liters. After 6.725 liters are used, how many liters remain?

Work space

Practice 7: Decimal addition and subtraction review

Name: _____ Date: _____

Show your estimates before calculating.

1. Estimate and find $45.67 + 8.905$.

Work space

2. Estimate and find $30.2 - 14.786$.

Work space

3. Find the missing number: $6.4 + \square = 10.025$.

Work space

Practice 8: Multiply by whole numbers

Name: _____ Date: _____

Use place value and show partial products.

1. 3.26×4

Work space

2. 12.405×6

Work space

3. One notebook costs 2.75. What is the cost of 8 notebooks?

Work space

Practice 9: Multiply decimals by powers of ten

Name: _____ Date: _____

Explain how the place values change.

1. 0.482×100

Work space

2. $7.09 \times 1,000$

Work space

3. Find the number that makes $5.6 \times \square = 560$.

Work space

Practice 10: Divide decimals by whole numbers

Name: _____ Date: _____

Divide carefully and check by multiplication.

1. $8.4 \div 4$

Work space

2. $36.75 \div 5$

Work space

3. 14.4 pounds of rice are put equally into 6 bags. How many pounds per bag?

Work space

Practice 11: Divide by powers of ten

Name: _____ Date: _____

Use place value to divide.

1. $63.5 \div 10$

Work space

2. $4.08 \div 100$

Work space

3. $725 \div 1,000$

Work space

Practice 12: Decimal multiplication strategies

Name: _____ Date: _____

Estimate first and explain where the decimal belongs.

1. 4.8×2.5

Work space

2. 0.36×0.7

Work space

3. A rectangle is 3.5 feet long and 1.2 feet wide. Find its area.

Work space

Practice 13: Decimal division strategies

Name: _____ Date: _____

Use a model, equivalent fractions, or long division.

1. $5.6 \div 0.7$

Work space

2. $12.48 \div 0.6$

Work space

3. 7.5 meters of ribbon is cut into pieces of 0.5 meter. How many pieces result?

Work space

Practice 14: Money and decimals

Name: _____ Date: _____

Show dollar signs and align cents.

1. Find the total: $\$12.75 + \$8.49 + \$3.60$.

Work space

2. You pay \$20.00 for an item costing \$13.68. Find the change.

Work space

3. Four equal tickets cost \$27.60. What is the cost of one ticket?

Work space

Practice 15: Measurement with decimals

Name: _____ Date: _____

Use the units in each problem.

1. A board is 8.75 feet long. Another is 6.4 feet long. What is their combined length?

Work space

2. A pitcher has 2.5 liters. You pour out 0.875 liter. How much remains?

Work space

3. A cyclist rides 4.25 miles each day for 6 days. How many miles total?

Work space

Practice 16: Missing decimals

Name: _____ Date: _____

Find the unknown and explain your operation.

1. $15.2 - \square = 9.875$

Work space

2. $\square + 2.67 = 8.005$

Work space

3. $\square \times 4 = 7.2$

Work space

Practice 17: Multi-step decimal problems

Name: _____ Date: _____

Write an equation for each problem.

1. A store sells 3 packs at \$4.25 each and a \$2.50 snack. What is the total?

Work space

2. A 12.5-mile trip is completed in two parts: 7.85 miles and the rest. Find the second part.

Work space

3. Six students share 9.6 liters of water equally. How many liters each?

Work space

Practice 18: Reason about decimal answers

Name: _____ Date: _____

Decide whether each statement is true. Correct it if false.

1. “0.45 is greater than 0.5 because $45 > 5$.” Explain.

Work space

2. “Multiplying 2.4 by 0.2 makes a larger number.” Explain.

Work space

3. Which is more reasonable for $48.7 \div 5$: 0.974 or 9.74? Explain and solve.

Work space

Practice 19: Mixed review

Name: _____ Date: _____

Show all work and label answers when needed.

1. Round 6.249 to the nearest hundredth, then add 3.75.

Work space

2. Find 9.6×2.75 .

Work space

3. A 24.8-meter rope is cut into 8 equal pieces. Find each length.

Work space

Practice 20: Decimal challenge

Name: _____ Date: _____

Solve and explain your reasoning.

1. A rectangular garden is 6.25 m long and 3.2 m wide. Find its area.

Work space

2. You have \$50. You buy 3 notebooks at \$4.85 each and a pen for \$2.75. How much money remains?

Work space

3. Create a decimal between 4.06 and 4.07, explain why it belongs there, and write it in words.

Work space
