

Worked Answer Key

Page 1

1. Diego read the most, with 7 books. He read $7 - 4 = 3$ more than Chloe.
2. $6 + 9 + 4 + 7 = 26$ books.

Page 2

1. $24 + 27 = 51$ plants.
2. $27 - 15 = 12$ plants.

Page 3

1. $36 + 18 + 12 + 9 = 75$ pounds.
2. $36 - 12 = 24$ pounds.

Page 4

1. Kai: $18 + 24 + 21 = 63$ pages.
2. Mia: $25 + 19 + 26 = 70$; $70 - 63 = 7$ pages greater.

Page 5

1. $8 + 6 + 5 + 3 = 22$ students.
2. Apples: $8/22 = 4/11$.

Page 6

1. 4 inches appears three times, so 4 inches is most common.
2. $6 - 2 = 4$ inches.

Page 7

1. $1 + 2 + 2 + 3 + 3 + 3 + 4 + 6 = 24$ stickers.
2. Values at least 3 are 3, 3, 3, 4, and 6: 5 cards.

Page 8

1. Sum = $72 + 80 + 88 + 90 + 70 = 400$; $400/5 = 80$.
2. New sum = $400 + 82 = 482$; $482/6 = 80\frac{1}{3}$, or about 80.3.

Page 9

1. Ordered: 68, 69, 70, 72, 72, 72, 75. The middle value is 72°.
2. Mode is 72° because it appears three times.

Page 10

1. Range = $25 - 10 = 15$ minutes.
2. New maximum is 30; range = $30 - 10 = 20$. It increases by 5 minutes.

Page 11

1. Thursday, with 50 visitors.
2. $32 + 45 + 38 = 115$ visitors.

Page 12

1. $14 - 6 = 8$ more cats.
2. Dogs: $9/32 = 0.28125$, or 28.125% (about 28.1%).

Page 13

1. Blue scored more in Games 1 and 4: $22 > 18$ and $25 > 16$.
2. Red: $18 + 24 + 20 + 16 = 78$. Blue: $22 + 19 + 20 + 25 = 86$.

Page 14

1. Four stars $\times$ 4 students = 16 students.
2. Art and Drama: $(3 + 1) \times 4 = 16$ students.

Page 15

1. Oranges: $8/40 = 1/5$.
2. Apples or bananas: $(15 + 10)/40 = 25/40 = 5/8$.

Page 16

1. There are $5 + 3 + 2 = 10$ marbles; blue probability = $3/10$.
2. Red is more likely: 5 red marbles compared with 2 green marbles.

Page 17

1. $125 + 178 = 303$ tickets.
2. $303 \times 4 = 1,212$ dollars.

Page 18

1. Growth: Week 1→2 is 3 cm, Week 2→3 is 4 cm, Week 3→4 is 1 cm. Most growth was between Weeks 2 and 3.
2. $14 - 6 = 8$ cm.

Page 19

1. A bar graph compares separate categories or months clearly; a line graph is better for showing change over a continuous time sequence. Either choice can be defended if the reason matches the graph. For separate monthly totals, bar graph is the best choice.
2. $8 + 5 + 11 + 7 = 31$ rainy days.

Page 20

1. Ordered votes: 5, 8, 12, 15. With four values, median is the mean of middle two: $(8 + 12)/2 = 10$ votes.
2. Total votes = $12 + 8 + 15 + 5 = 40$. Game day: $15/40 = 3/8 = 37.5\%$.
