

Practice 1: Read a data set

Name: _____ Date: _____

For each data set, find the **mean, median, mode, and range**. Show your work.

1. 4, 6, 6, 8, 11

Work space

2. 3, 5, 7, 7, 8, 12

Work space

Practice 2: Mean as fair share

Divide the total equally to find each mean.

1. Find the mean of 12, 16, 20, and 24.

Work space

2. Five friends collected 7, 9, 10, 12, and 17 cans. What is the mean number collected?

Work space

Practice 3: Mean with larger numbers

1. Find the mean of 25, 30, 35, 40, and 45.

Work space

2. A team scored 18, 22, 26, and 30 points. Find the mean score.

Work space

Practice 4: Mean with a missing value

Use the mean to work backward. Total = mean $\times$ number of values.

1. The mean of 4 numbers is 15. Three numbers are 11, 14, and 18. What is the missing number?

Work space

2. The mean of 5 scores is 12. Four scores are 8, 10, 13, and 15. Find the fifth score.

Work space

Practice 5: Median of an odd-sized set

Put values in order before selecting the middle.

1. Find the median: 14, 3, 9, 7, 11.

Work space

2. Find the median: 21, 18, 25, 19, 16, 24, 20.

Work space

Practice 6: Median of an even-sized set

For an even number of values, average the two middle values.

1. Find the median: 4, 10, 6, 12, 8, 14.

Work space

2. Find the median: 31, 25, 18, 22, 29, 35, 27, 20.

Work space

Practice 7: Median in context

1. Daily temperatures were 62, 68, 65, 70, and 61°F. What was the median temperature?

Work space

2. Five books have 120, 95, 140, 110, and 85 pages. Find the median number of pages.

Work space

Practice 8: Mode

The mode is the value that occurs most often.

1. Find the mode: 2, 5, 5, 7, 8, 5, 9.

Work space

2. Find the mode: 12, 14, 12, 16, 14, 12, 18, 14, 14.

Work space

Practice 9: No mode and more than one mode

1. Does 3, 4, 5, 6, 7 have a mode? Explain.

Work space

2. Find all modes: 1, 2, 2, 3, 4, 4, 5, 6.

Work space

Practice 10: Range

Range = greatest value – least value.

1. Find the range: 16, 9, 21, 13, 18.

Work space

2. Find the range of these lap times in seconds: 48, 52, 45, 60, 55.

Work space

Practice 11: Compare spread

1. Set A is 4, 7, 8, 9, 12. Set B is 2, 5, 8, 11, 14. Find each range. Which has greater spread?

Work space

2. Find the range of 103, 98, 115, 107, and 101.

Work space

Practice 12: Choose the best measure

Find the requested measure and explain what it tells you.

1. Find the mean of 6, 8, 10, 12, and 14. Explain its meaning.

Work space

2. Find the median of 2, 3, 4, 20, and 21. Why might median be useful here?

Work space

Practice 13: All four measures

1. Find mean, median, mode, and range: 5, 7, 7, 8, 10, 12.

Work space

2. Find all four measures: 9, 11, 11, 13, 16.

Work space

Practice 14: Read a frequency table

The table shows number of pets owned. Use the repeated values.

1. Pets: 0, 1, 2, 3. Families: 2, 5, 4, 1. List the data set and find its mode.

Work space

2. In that data set, find the range.

Work space

Practice 15: Mean from a table

1. A survey gives values 1, 2, 3 with frequencies 3, 2, 1. List the six values and find the mean.

Work space

2. Find the median of the same six values.

Work space

Practice 16: Unknown data values

1. A set has mean 20 and 4 values. Three values are 16, 19, and 25. Find the fourth.

Work space

2. A set has range 18. Its least value is 7. What is its greatest value?

Work space

Practice 17: Reason about changes

1. Data are 4, 6, 8, 10. Add 12. What happens to the mean? Find both means.

Work space

2. Data are 3, 5, 5, 7, 9. Add 20. What happens to the median and range?

Work space

Practice 18: Word problems

1. Maya read 18, 22, 15, 25, and 20 pages on five days. Find the mean and range.

Work space

2. Five plants grew 8, 11, 9, 11, and 6 cm. Find the median and mode.

Work space

Practice 19: Mixed review

1. Find all four measures: 24, 18, 21, 18, 30, 27, 18.

Work space

2. A data set has mean 14, median 13, mode 12, and range 9. What is the greatest value if the least value is 5?

Work space

Practice 20: Show what you know

1. For 6, 8, 8, 10, 13, calculate mean, median, mode, and range. Label every step.

Work space

2. Write a six-number data set with mean 10, median 10, mode 8, and range 12. Verify all four measures.

Work space
