

Practice 1: Read a table

Name: _____ Date: _____

The table shows books read by four students in one month.

Student	Ava	Ben	Chloe	Diego
Books	6	9	4	7

1. Who read the most books? How many more than Chloe?

Work space

2. How many books did the four students read altogether?

Work space

Practice 2: Tables and comparison

Use this table of plants sold at a school fair.

Day	Mon	Tue	Wed	Thu
Plants	18	24	15	27

1. How many plants were sold on Tuesday and Thursday together?

Work space

2. How many more plants were sold Thursday than Wednesday?

Work space

Practice 3: Totals and differences

The table records a class’s recycling in pounds.

Material	Paper	Plastic	Glass	Metal
Pounds	36	18	12	9

1. What is the total weight recycled?

Work space

2. How many more pounds of paper than glass were recycled?

Work space

Practice 4: Missing table values

Each row shows the number of pages read each day.

Reader	Monday	Tuesday	Wednesday	Total
Kai	18	24	21	
Mia	25	19	26	

1. Find Kai’s total.

Work space

2. Mia’s total is how many pages greater than Kai’s total?

Work space

Practice 5: Frequency tables

Students chose a favorite fruit.

Fruit	Apple	Banana	Orange	Grape
Votes	8	6	5	3

1. How many students voted?

Work space

2. What fraction of the votes were for apples? Write it in simplest form.

Work space

Practice 6: Line plots

This line plot is represented by the data values (in inches): 2, 3, 3, 4, 4, 4, 5, 6.

1. What is the most common length?

Work space

2. What is the difference between the longest and shortest lengths?

Work space

Practice 7: Line plot totals

The numbers of stickers on eight cards are: 1, 2, 2, 3, 3, 3, 4, 6.

1. How many stickers are on all eight cards?

Work space

2. How many cards have at least 3 stickers?

Work space

Practice 8: Mean (average)

Five quiz scores are 72, 80, 88, 90, and 70.

1. Find the mean score.

Work space

2. If a sixth score of 82 is added, what is the new mean?

Work space

Practice 9: Median and mode

The daily temperatures were 68, 72, 70, 72, 75, 69, and 72 degrees.

1. Find the median temperature. Show the ordered list.

Work space

2. Find the mode and explain what it means here.

Work space

Practice 10: Range and spread

The number of minutes spent reading by six students is 12, 18, 15, 25, 20, and 10.

1. Find the range.

Work space

2. Add a seventh value of 30. Does the range increase or decrease, and by how much?

Work space

Practice 11: Bar graph data

Imagine a bar graph with the following numbers of library visitors: Monday 32, Tuesday 45, Wednesday 38, Thursday 50, Friday 35.

1. Which day had the most visitors?

Work space

2. How many visitors came Monday through Wednesday altogether?

Work space

Practice 12: Bar graph comparisons

An animal shelter placed 14 cats, 9 dogs, 6 rabbits, and 3 birds in homes.

1. How many more cats than rabbits were placed?

Work space

2. What percent of the 32 animals were dogs? Give a fraction and a decimal.

Work space

Practice 13: Double bar graph data

Two teams recorded points in four games.

Game	1	2	3	4
Red	18	24	20	16
Blue	22	19	20	25

1. In which games did Blue score more than Red?

Work space

2. What was the total score for each team?

Work space

Practice 14: Picture graph reasoning

In a picture graph, each [star] represents 4 students. Clubs have: Art [star] [star] [star], Chess [star] [star], Music [star] [star] [star] [star], and Drama [star].

1. How many students chose Music?

Work space

2. How many students chose Art and Drama together?

Work space

Practice 15: Data and fractions

A survey of 40 students found 15 prefer apples, 10 bananas, 8 oranges, and 7 pears.

1. What fraction prefer oranges? Simplify it.

Work space

2. What fraction prefer apples or bananas? Simplify it.

Work space

Practice 16: Probability from data

A bag contains 5 red, 3 blue, and 2 green marbles. Each marble is equally likely to be chosen.

1. What is the probability of choosing a blue marble? Give a fraction.

Work space

2. Is choosing a red marble more likely, less likely, or equally likely as choosing a green marble? Explain.

Work space

Practice 17: Two-step data problems

The school sold 125 tickets Friday and 178 Saturday. Each ticket cost \$4.

1. How many tickets were sold altogether?

Work space

2. How much money was collected altogether?

Work space

Practice 18: Interpret a data trend

A plant's height was measured weekly: Week 1: 6 cm, Week 2: 9 cm, Week 3: 13 cm, Week 4: 14 cm.

1. Between which two weeks did it grow the most?

Work space

2. How many centimeters did it grow altogether from Week 1 to Week 4?

Work space

Practice 19: Choose a graph

The number of rainy days in four months was March 8, April 5, May 11, and June 7.

1. Would a bar graph or a line graph better compare the four separate months? Give one reason.

Work space

2. What is the total number of rainy days?

Work space

Practice 20: Mixed data review

The table shows votes for a class choice. Each student voted for exactly one choice.

Choice	Field trip	Movie	Game day	Art day
Votes	12	8	15	5

1. What was the median number of votes? Show the ordered list.

Work space

2. What percentage of students chose Game day?

Work space
