

Page 1

1. $7 \times 8 = 56$.
2. $40 \times 6 = (4 \times 6) \times 10 = 24 \times 10 = 240$. The zero in 40 shows there are no ones: 40 is 4 tens. Six groups of 4 tens make 24 tens, or 240, which also has no ones.

Page 2

1. $9 \times 12 = 9 \times (10 + 2) = 90 + 18 = 108$.
2. $25 \times 4 = 100$ because four groups of 25 make one hundred.

Page 3

1. $6 \times 23 = 6 \times 20 + 6 \times 3 = 120 + 18 = 138$.
2. $8 \times 47 = 8 \times 40 + 8 \times 7 = 320 + 56 = 376$.

Page 4

1. $36 \times 20 = 36 \times 2 \times 10 = 72 \times 10 = 720$.
2. $405 \times 300 = 405 \times 3 \times 100 = 1,215 \times 100 = 121,500$.

Page 5

1. $24 \times 16 = 24 \times (10 + 6) = 240 + 144 = 384$.
2. $38 \times 27 = 38 \times (20 + 7) = 760 + 266 = 1,026$.

Page 6

1. $52 \times 34 = 52 \times (30 + 4) = 1,560 + 208 = 1,768.$
2. $67 \times 45 = 67 \times (40 + 5) = 2,680 + 335 = 3,015.$

Page 7

1. $326 \times 4 = 1,304.$
2. $708 \times 6 = 4,248.$

Page 8

1. $945 \times 7 = 6,615.$
2. $1,206 \times 8 = 9,648.$

Page 9

1. $214 \times 32 = 214 \times (30 + 2) = 6,420 + 428 = 6,848.$
2. $305 \times 24 = 305 \times (20 + 4) = 6,100 + 1,220 = 7,320.$

Page 10

1. $417 \times 36 = 417 \times (30 + 6) = 12,510 + 2,502 = 15,012.$
2. $582 \times 41 = 582 \times (40 + 1) = 23,280 + 582 = 23,862.$

Page 11

1. $2,438 \times 6 = 14,628$.
2. $7,105 \times 9 = 63,945$.

Page 12

1. $1,204 \times 23 = 1,204 \times (20 + 3) = 24,080 + 3,612 = 27,692$.
2. $3,516 \times 42 = 3,516 \times (40 + 2) = 140,640 + 7,032 = 147,672$.

Page 13

1. $398 \approx 400$; $400 \times 6 = 2,400$. Estimate: **2,400**.
2. $62 \approx 60$, $49 \approx 50$; $60 \times 50 = 3,000$. Estimate: **3,000**.

Page 14

1. Exact: $197 \times 31 = 197 \times (30 + 1) = 5,910 + 197 = 6,107$. Estimate $200 \times 30 = 6,000$. The exact product is close to the estimate (107 more), so it is reasonable.
2. Exact: $2,908 \times 5 = 14,540$. Estimate $3,000 \times 5 = 15,000$. The exact product is close to and below the estimate (460 less), as expected because 2,908 was rounded up.

Page 15

1. $3.4 \times 6 = 20.4$. Since 3.4 is 34 tenths, $34 \times 6 = 204$ tenths. The decimal belongs one place from the right: 20.4.
2. $2.35 \times 4 = 9.40 = 9.4$. Since 2.35 is 235 hundredths, $235 \times 4 = 940$ hundredths. The decimal belongs two places from the right: 9.40.

Page 16

1. $1.2 \times 0.5 = 0.60 = 0.6$.
2. $4.06 \times 0.3 = 1.218$.

Page 17

1. Area = $14 \times 9 = 126$ square centimeters.
2. $18 \times 12 = 216$ tiles.

Page 18

1. Equation: $26 \times 48 = 48 \times (20 + 6) = 960 + 288 = 1,248$. The school orders **1,248 pencils**.
2. Equation: $35 \times 24 = 35 \times (20 + 4) = 700 + 140 = 840$. The theater has **840 seats**.

Page 19

1. $8 \times 15 = 120$ stickers; $120 - 27 = 93$. **93 remain**.
2. $14 \times 32 = 448$; $448 + 125 = 573$. **573 plants**.

Page 20

1. $2,406 \times 17 = 2,406 \times (10 + 7) = 24,060 + 16,842 = 40,902$.
2. One piece is $7.5 \div 6 = 1.25$ meters long. Six such pieces have a total length of $1.25 \times 6 = 7.50 = 7.5$ meters, the length of the original ribbon.
