

Practice 1: Meaning of Division

Name: _____ Date: _____

Show your thinking. Write an equation for each situation.

1. Share 48 stickers equally among 6 students. How many stickers does each student get?

Work space

2. There are 7 rows of 8 chairs. How many chairs are there? Write a related division fact.

Work space

Practice 2: Fact Families

Name: _____ Date: _____

Use multiplication to help solve each division problem.

1. $63 \div 9$

Work space

2. $96 \div 12$

Work space

Practice 3: One-Digit Divisors

Name: _____ Date: _____

Find each quotient. Show an equation or partial products.

1. $735 \div 5$

Work space

2. $864 \div 8$

Work space

Practice 4: Two-Digit Divisors

Name: _____ Date: _____

Use long division or an area model.

1. $924 \div 22$

Work space

2. $1,176 \div 28$

Work space

Practice 5: Quotient Digits

Name: _____ Date: _____

Pay attention to place value when a quotient has a zero.

1. $4,032 \div 6$

Work space

2. $5,040 \div 7$

Work space

Practice 6: Division with Remainders

Name: _____ Date: _____

Write each answer as quotient R remainder. Check that the remainder is less than the divisor.

1. $157 \div 6$

Work space

2. $389 \div 9$

Work space

Practice 7: Remainder Equations

Name: _____ Date: _____

Use $\text{dividend} = \text{divisor} \times \text{quotient} + \text{remainder}$.

1. Find the quotient and remainder for $2,365 \div 14$. Then write the checking equation.

Work space

2. Find the quotient and remainder for $4,118 \div 25$. Then write the checking equation.

Work space

Practice 8: Interpret the Remainder

Name: _____ Date: _____

Decide whether to ignore, round up, or report the remainder.

1. 74 students ride vans that hold 8 students each. How many vans are needed?

Work space

2. 74 apples are packed into bags of 8. How many full bags and how many apples left over?

Work space

Practice 9: Equal Groups

Name: _____ Date: _____

Solve each equal-group problem and label your answer.

1. A farm packs 1,248 eggs equally into 24 cartons. How many eggs per carton?

Work space

2. A school has 936 pencils and puts 18 in each box. How many boxes can it fill?

Work space

Practice 10: Sharing with Leftovers

Name: _____ Date: _____

Show what the remainder means in each context.

1. 527 books are placed on shelves holding 32 books each. How many full shelves and books remain?

Work space

2. 1,005 flyers are bundled in groups of 40. How many full bundles and flyers remain?

Work space

Practice 11: Estimate Quotients

Name: _____ Date: _____

Choose compatible numbers to estimate, then find the exact quotient.

1. Estimate and solve $2,916 \div 7$.

Work space

2. Estimate and solve $6,284 \div 31$.

Work space

Practice 12: Check for Reasonableness

Name: _____ Date: _____

Circle the reasonable answer and explain why.

1. $3,528 \div 9$ is 392 or 3,920. Which is reasonable?

Work space

2. Which is a reasonable estimate for $8,190 \div 27$: 30 or 300?

Work space

Practice 13: Divisibility Clues

Name: _____ Date: _____

Use divisibility rules to decide whether each number is divisible without a remainder.

1. Is 4,572 divisible by 3, 6, and 9? Explain each decision.

Work space

2. Is 8,425 divisible by 5, 10, and 25? Explain each decision.

Work space

Practice 14: Missing Numbers

Name: _____ Date: _____

Find the missing number. Use multiplication to verify.

1. $\square \div 18 = 47$

Work space

2. $2,736 \div \square = 76$

Work space

Practice 15: Compare Quotients

Name: _____ Date: _____

Solve both and compare using $<$, $>$, or $=$.

1. $1,440 \div 12$ ____ $1,440 \div 15$

Work space

2. $2,400 \div 16$ ____ $3,000 \div 20$

Work space

Practice 16: Two-Step Problems

Name: _____ Date: _____

Write an equation for each step.

1. A theater has 15 rows of 28 seats. The seats are split equally among 7 sections. How many seats per section?

Work space

2. A baker makes 9 trays of 36 muffins, then packs them equally into 12 boxes. How many muffins per box?

Work space

Practice 17: Money and Measurement

Name: _____ Date: _____

Include units in your answer.

1. A \$84 bill is split equally among 6 people. How much does each person pay?

Work space

2. A 3,456-meter trail is divided into 24 equal sections. How long is each section?

Work space

Practice 18: Error Analysis

Name: _____ Date: _____

Decide whether each claim is correct. Correct any error and explain your reasoning.

1. Jordan says $685 \div 8 = 85 \text{ R } 5$. Is Jordan correct?

Work space

2. A student says $1,248 \div 16 = 708$. Use estimation and multiplication to respond.

Work space

Practice 19: Mixed Review

Name: _____ Date: _____

Solve and show a check for each.

1. $7,245 \div 15$

Work space

2. $5,678 \div 24$

Work space

Practice 20: Challenge Review

Name: _____ Date: _____

Explain your reasoning clearly.

1. A camp has 2,375 campers. Buses hold 48 campers. Fill each bus before using the next. How many buses are needed, and how many campers ride the last bus?

Work space

2. Find a five-digit number that has quotient 1,234 and remainder 7 when divided by 9. Explain how you know it works.

Work space
