

Practice 1: Fraction vocabulary

Name: _____ Date: _____

Write each fraction and identify its numerator and denominator.

1. Draw and shade a rectangle to show $\frac{3}{8}$, or describe how you would do so. Which number is the numerator? Which is the denominator?

Work space

2. A pizza is cut into 6 equal pieces. Mia eats 5 pieces. Write the fraction eaten and the fraction left.

Work space

Practice 2: Fractions on a number line

Name: _____ Date: _____

Draw a number line from 0 to 1 for Problem 1. Explain each answer.

1. Place $\frac{2}{5}$ and $\frac{4}{5}$ on a number line.

Work space

2. Which is closer to 1: $\frac{7}{8}$ or $\frac{5}{8}$? Use the number line or reasoning.

Work space

Practice 3: Compare like denominators

Name: _____ Date: _____

Compare using $<$, $>$, or $=$. Explain how the numerator helps.

1. $\frac{3}{7} \square \frac{5}{7}$

Work space

2. $\frac{9}{10} \square \frac{6}{10}$. Then write one sentence explaining your choice.

Work space

Practice 4: Compare like numerators

Name: _____ Date: _____

Compare. When numerators match, the fraction with the smaller denominator is larger.

1. $\frac{4}{5}$ $\square$ $\frac{4}{9}$

Work space

2. $\frac{7}{12}$ $\square$ $\frac{7}{8}$. Draw a model to support your answer.

Work space

Practice 5: Equivalent fractions

Name: _____ Date: _____

Find an equivalent fraction by multiplying or dividing the numerator and denominator by the same number.

1. Complete $\frac{3}{4} = \frac{\square}{20}$.

Work space

2. Complete $\frac{18}{24} = \frac{\square}{4}$. Show the common factor you divide by.

Work space

Practice 6: Simplest form

Name: _____ Date: _____

Reduce each fraction to simplest form. Show the common factor.

1. $\frac{12}{18}$

Work space

2. $\frac{35}{50}$

Work space

Practice 7: Compare with benchmarks

Name: _____ Date: _____

Use 0, $\frac{1}{2}$, or 1 as a benchmark, then compare.

1. Which is greater: $\frac{5}{12}$ or $\frac{7}{12}$? Is either greater than $\frac{1}{2}$?

Work space

2. Which is closer to 1: $\frac{9}{10}$ or $\frac{5}{6}$? Explain.

Work space

Practice 8: Compare unlike denominators

Name: _____ Date: _____

Find a common denominator or use equivalent fractions.

1. $\frac{2}{3} \square \frac{3}{5}$

Work space

2. $\frac{5}{8} \square \frac{7}{12}$. Show equivalent fractions with a common denominator.

Work space

Practice 9: Add like denominators

Name: _____ Date: _____

Add the numerators and keep the denominator. Simplify when possible.

1. $\frac{3}{8} + \frac{2}{8}$

Work space

2. $\frac{5}{12} + \frac{4}{12}$

Work space

Practice 10: Subtract like denominators

Name: _____ Date: _____

Subtract the numerators and simplify when possible.

1. $\frac{7}{9} - \frac{2}{9}$

Work space

2. $\frac{11}{15} - \frac{6}{15}$

Work space

Practice 11: Add unlike denominators

Name: _____ Date: _____

Rename the fractions with a common denominator before adding.

1. $\frac{1}{2} + \frac{1}{4}$

Work space

2. $\frac{2}{3} + \frac{1}{6}$

Work space

Practice 12: Subtract unlike denominators

Name: _____ Date: _____

Find a common denominator, subtract, and simplify.

1. $\frac{3}{4} - \frac{1}{8}$

Work space

2. $\frac{5}{6} - \frac{1}{3}$

Work space

Practice 13: Mixed numbers and improper fractions

Name: _____ Date: _____

Convert each form. Show groups of one whole.

1. Convert $2\frac{3}{5}$ to an improper fraction.

Work space

2. Convert $17/4$ to a mixed number.

Work space

Practice 14: Add mixed numbers

Name: _____ Date: _____

Add whole numbers and fractional parts. Regroup if needed.

1. $2\frac{1}{4} + 1\frac{2}{4}$

Work space

2. $3\frac{3}{5} + 2\frac{4}{5}$

Work space

Practice 15: Subtract mixed numbers

Name: _____ Date: _____

Subtract. Regroup one whole when the first fractional part is too small.

1. $4\frac{1}{3} - 2\frac{2}{3}$

Work space

2. $6\frac{1}{4} - 3\frac{3}{4}$

Work space

Practice 16: Fraction of a whole number

Name: _____ Date: _____

Find the stated fraction of each number. Explain your division or multiplication.

1. Find $\frac{3}{5}$ of 20.

Work space

2. Find $\frac{7}{8}$ of 32.

Work space

Practice 17: Fraction word problems

Name: _____ Date: _____

Write an equation, solve, and label your answer.

1. Ava walked $\frac{2}{5}$ mile in the morning and $\frac{1}{5}$ mile in the afternoon. How far did she walk altogether?

Work space

2. A 3-foot ribbon has $\frac{3}{4}$ foot cut away. How much remains?

Work space

Practice 18: Measurement and fractions

Name: _____ Date: _____

Use the units in the problem and show your reasoning.

1. A recipe uses $2\frac{2}{3}$ cup of oats and $1\frac{1}{6}$ cup of nuts. How many cups are used?

Work space

2. A board is $5\frac{1}{2}$ feet long. A piece $2\frac{3}{4}$ feet long is cut off. How much remains?

Work space

Practice 19: Explain and find the error

Name: _____ Date: _____

Decide whether each statement is correct. Correct any error and explain.

1. Jordan says $\frac{1}{3} + \frac{1}{4} = \frac{2}{7}$. Is Jordan correct? Show the correct calculation.

Work space

2. Lee says $\frac{5}{8} > \frac{3}{4}$ because 5 is greater than 3. Is Lee correct? Explain with equivalent fractions.

Work space

Practice 20: Mixed review

Name: _____ Date: _____

Solve each problem and show enough work for another person to follow.

1. Order from least to greatest: $\frac{2}{3}$, $\frac{3}{4}$, $\frac{5}{8}$. Explain your strategy.

Work space

2. A class read $1\frac{1}{2}$ books on Monday and $2\frac{3}{4}$ books on Tuesday. How many books did they read in all?

Work space
